Introduction

Reactome is open-source, open access, manually curated and peer-reviewed pathway database. Pathway annotations are authored by expert biologists, in collaboration with Reactome editorial staff and cross-referenced to many bioinformatics databases. A system of evidence tracking ensures that all assertions are backed up by the primary literature. Reactome is used by clinicians, geneticists, genomics researchers, and molecular biologists to interpret the results of high-throughput experimental studies, by bioinformaticians seeking to develop novel algorithms for mining knowledge from genomic studies, and by systems biologists building predictive models of normal and disease variant pathways.

The development of Reactome is supported by grants from the US National Institutes of Health (P41 HG003751), University of Toronto (CFREF Medicine by Design), European Union (EU STRP, EMI-CD), and the European Molecular Biology Laboratory (EBI Industry program).

Literature references

Reactome database release: 70

This document contains 1 pathway and 44 reactions (see Table of Contents)
Integrin cell surface interactions

Stable identifier: R-MMU-216083

Inferred from: Integrin cell surface interactions (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/parologue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp
Collagen types III, IV, V, VI, VIII, IX, XVI bind integrins alpha1beta1 and alpha2beta1

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-2327695

**Type:** binding

**Compartments:** plasma membrane, extracellular region

**Inferred from:** Collagen types III, IV, V, VI, VIII, IX, XVI bind integrins alpha1beta1 and alpha2beta1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

<a href='/electronic_inference_compara.html' target='NEW'>More details and caveats of the event inference in Reactome. For details on PANTHER see also: <a href='http://www.pantherdb.org/about.jsp' target='NEW'>http://www.pantherdb.org/about.jsp</a>
**Collagen type I binds integrin alpha11beta1**

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-216045

**Type:** binding

**Compartments:** extracellular region, plasma membrane

**Inferred from:** Collagen type I binds integrin alpha11beta1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: [http://www.pantherdb.org/about.jsp](http://www.pantherdb.org/about.jsp)
Collagen type II binds integrin alpha10beta1

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-216043

**Type:** binding

**Compartments:** extracellular region, plasma membrane

**Inferred from:** Collagen type II binds integrin alpha10beta1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: <a href='http://www.pantherdb.org/about.jsp' target='NEW'>http://www.pantherdb.org/about.jsp</a>
Collagen type VII binds integrin alpha2beta1

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-4086216

**Type:** binding

**Compartments:** plasma membrane, extracellular region

**Inferred from:** Collagen type VII binds integrin alpha2beta1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: [http://www.pantherdb.org/about.jsp](http://www.pantherdb.org/about.jsp)
Collagen type XIII binds Integrin alpha1beta1

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-2484965

**Type:** binding

**Compartments:** plasma membrane

**Inferred from:** Collagen type XIII binds Integrin alpha1beta1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/parologue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp

http://www.reactome.org
Collagen types VI, IX bind integrin alpha10beta1

Location: Integrin cell surface interactions

Stable identifier: R-MMU-4084903

Type: binding

Compartments: plasma membrane, extracellular region

Inferred from: Collagen types VI, IX bind integrin alpha10beta1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: [http://www.pantherdb.org/about.jsp](http://www.pantherdb.org/about.jsp)
Collagen type IX binds integrin alpha11beta1

Location: Integrin cell surface interactions

Stable identifier: R-MMU-4086223

Type: binding

Compartments: plasma membrane, extracellular region

Inferred from: Collagen type IX binds integrin alpha11beta1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp

http://www.pantherdb.org/about.jsp
**Arresten binds integrin alpha1beta1**

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-4084912

**Type:** binding

**Compartments:** plasma membrane

**Inferred from:** Arresten binds integrin alpha1beta1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

[More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp](http://www.pantherdb.org/about.jsp)
Endostatin binds integrin alphaVbeta3, alphaVbeta5, alpha3beta1, alpha5beta1

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-4088264

**Type:** binding

**Compartments:** extracellular region, plasma membrane

**Inferred from:** Endostatin binds integrin alphaVbeta3, alphaVbeta5, alpha3beta1, alpha5beta1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

<a href='/electronic_inference_compara.html' target = 'NEW'>More details and caveats of the event inference in Reactome. For details on PANTHER see also: <a href='http://www.pantherdb.org/about.jsp' target='NEW'>http://www.pantherdb.org/about.jsp

https://www.reactome.org
**Tumstatin binds integrin alphaVbeta 3, alpha3beta1**

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-4085083

**Type:** binding

**Compartments:** plasma membrane, extracellular region

**Inferred from:** Tumstatin binds integrin alphaVbeta 3, alpha3beta1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

[a href='/electronic_inference_compara.html' target = 'NEW']More details and caveats of the event inference in Reactome. For details on PANTHER see also: [a href='http://www.pantherdb.org/about.jsp' target='NEW']http://www.pantherdb.org/about.jsp
Canstatin binds integrins alphaVbeta3, alphaVbeta5

Location: Integrin cell surface interactions

Stable identifier: R-MMU-4085087

Type: binding

Compartments: plasma membrane, extracellular region

Inferred from: Canstatin binds integrins alphaVbeta3, alphaVbeta5 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp
Tetrastatin binds integrin alphaVbeta3

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-4088218

**Type:** binding

**Compartments:** plasma membrane, extracellular region

**Inferred from:** Tetrastatin binds integrin alphaVbeta3 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp
THBS1 (Thrombospondin-1) binds Integrin alpha3beta1, alpha4beta1

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-265429

**Type:** binding

**Compartments:** extracellular region, plasma membrane

**Inferred from:** THBS1 (Thrombospondin-1) binds Integrin alpha3beta1, alpha4beta1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp
Integrins alpha4beta1, alpha8beta1, alphaVbeta1, alphaVbeta3, alphaVbeta6 bind Fibronectin matrix

Location: Integrin cell surface interactions

Stable identifier: R-MMU-216050

Type: binding

Compartments: extracellular region, plasma membrane

Inferred from: Integrins alpha4beta1, alpha8beta1, alphaVbeta1, alphaVbeta3, alphaVbeta6 bind Fibronectin matrix (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp
SPP1 (osteopontin) binds integrin alpha5beta1, alpha9beta1

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-265424

**Type:** binding

**Compartments:** extracellular region, plasma membrane

**Inferred from:** SPP1 (osteopontin) binds integrin alpha5beta1, alpha9beta1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp
**SPP1 (osteopontin) binds CD44**

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-2752115

**Type:** binding

**Compartments:** plasma membrane, extracellular region

**Inferred from:** SPP1 (osteopontin) binds CD44 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp
VCAM1 binds Integrin alpha4beta1

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-198941

**Type:** binding

**Compartments:** plasma membrane

**Inferred from:** VCAM1 binds Integrin alpha4beta1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

[a href='/electronic_inference_compara.html' target = 'NEW']More details and caveats of the event inference in Reactome. For details on PANTHER see also: [a href='http://www.pantherdb.org/about.jsp' target='NEW']http://www.pantherdb.org/about.jsp

https://www.reactome.org
Integrin alpha4beta1 binds JAM2:JAM3

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-202706

**Type:** binding

**Compartments:** plasma membrane

**Inferred from:** Integrin alpha4beta1 binds JAM2:JAM3 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

[a href='/electronic_inference_compara.html' target='NEW']More details and caveats of the event inference in Reactome. For details on PANTHER see also: [a href='http://www.pantherdb.org/about.jsp' target='NEW']http://www.pantherdb.org/about.jsp
MADCAM1-1 binds Integrin alpha4beta7

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-199032

**Type:** binding

**Compartments:** plasma membrane

**Inferred from:** MADCAM1-1 binds Integrin alpha4beta7 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: [http://www.pantherdb.org/about.jsp](http://www.pantherdb.org/about.jsp)
Interaction of integrin alpha8beta1 with Tenascin-C

Location: Integrin cell surface interactions

Stable identifier: R-MMU-216064

Type: binding

Compartments: extracellular region, plasma membrane

Inferred from: Interaction of integrin alpha8beta1 with Tenascin-C (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp
**Interaction of integrin alpha9beta1 with VCAM1**

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-265428

**Type:** binding

**Compartments:** plasma membrane

**Inferred from:** Interaction of integrin alpha9beta1 with VCAM1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: [http://www.pantherdb.org/about.jsp](http://www.pantherdb.org/about.jsp)
Interaction of integrin alpha9beta1 with Tenascin-C

Location: Integrin cell surface interactions

Stable identifier: R-MMU-216068

Type: binding

Compartments: extracellular region, plasma membrane

Inferred from: Interaction of integrin alpha9beta1 with Tenascin-C (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp
Interaction of integrin alphaDbeta2 with fibrin

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-216069

**Type:** binding

**Compartments:** extracellular region, plasma membrane

**Inferred from:** Interaction of integrin alphaDbeta2 with fibrin (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/parologue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp

http://www.reactome.org
Interaction of integrin alphaXbeta2 with fibrin

Location: Integrin cell surface interactions

Stable identifier: R-MMU-216082

Type: binding

Compartments: extracellular region, plasma membrane

Inferred from: Interaction of integrin alphaXbeta2 with fibrin (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

<a href='/electronic_inference_compara.html' target = 'NEW'>More details and caveats of the event inference in Reactome. For details on PANTHER see also: <a href='http://www.pantherdb.org/about.jsp' target='NEW'>http://www.pantherdb.org/about.jsp
VTN (vitronectin) binds Integrin alphaVbeta3, alphaVbeta5, alphaVbeta8

Location: Integrin cell surface interactions

Stable identifier: R-MMU-216076

Type: binding

Compartments: extracellular region, plasma membrane

Inferred from: VTN (vitronectin) binds Integrin alphaVbeta3, alphaVbeta5, alphaVbeta8 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

<a href='/electronic_inference_compara.html' target='NEW'>More details and caveats of the event inference in Reactome. For details on PANTHER see also: <a href='http://www.pantherdb.org/about.jsp' target='NEW'>http://www.pantherdb.org/about.jsp
**Integrin alphaXbeta2 binds JAM3**

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-202704

**Type:** binding

**Compartments:** plasma membrane

**Inferred from:** Integrin alphaXbeta2 binds JAM3 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: [http://www.pantherdb.org/about.jsp](http://www.pantherdb.org/about.jsp)

https://www.reactome.org
ICAM1-5 bind Integrin alphaLbeta2 (LFA-1)

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-199050

**Type:** binding

**Compartments:** plasma membrane

**Inferred from:** ICAM1-5 bind Integrin alphaLbeta2 (LFA-1) (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

<a href='/electronic_inference_compara.html' target='NEW'>More details and caveats of the event inference in Reactome. For details on PANTHER see also: <a href='http://www.pantherdb.org/about.jsp' target='NEW'>http://www.pantherdb.org/about.jsp</a>
Integrin alphaLbeta2 (LFA-1) binds F11R (JAM-A)

Location: Integrin cell surface interactions

Stable identifier: R-MMU-202718

Type: binding

Compartments: plasma membrane

Inferred from: Integrin alphaLbeta2 (LFA-1) binds F11R (JAM-A) (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp

https://www.reactome.org
**Integrin alphaMbeta2 (MAC1) binds JAM3**

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-202727

**Type:** binding

**Compartments:** plasma membrane

**Inferred from:** Integrin alphaMbeta2 (MAC1) binds JAM3 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: [http://www.pantherdb.org/about.jsp](http://www.pantherdb.org/about.jsp)
BSG (basigin) binds Integrin alpha3beta1, alpha6beta1

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-204434

**Type:** binding

**Compartments:** plasma membrane

**Inferred from:** BSG (basigin) binds Integrin alpha3beta1, alpha6beta1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

<a href='/electronic_inference_compara.html' target='NEW'>More details and caveats of the event inference in Reactome. For details on PANTHER see also: </a><a href='http://www.pantherdb.org/about.jsp' target='NEW'>http://www.pantherdb.org/about.jsp</a>
Interaction of integrin alphaVbeta3 with IPSP (Bone sialoprotein 2)

**Location:** Integran cell surface interactions

**Stable identifier:** R-MMU-265427

**Type:** binding

**Compartments:** extracellular region, plasma membrane

**Inferred from:** Interaction of integrin alphaVbeta3 with IPSP (Bone sialoprotein 2) (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: [http://www.pantherdb.org/about.jsp](http://www.pantherdb.org/about.jsp)
**Interaction of integrin alphaVbeta3 with Tenascin**

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-265426

**Type:** binding

**Compartments:** extracellular region, plasma membrane

**Inferred from:** Interaction of integrin alphaVbeta3 with Tenascin (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

[a href='./electronic_inference_compara.html' target='NEW']More details and caveats of the event inference in Reactome. For details on PANTHER see also: [a href='http://www.pantherdb.org/about.jsp' target='NEW']http://www.pantherdb.org/about.jsp
Interaction of integrin alphaVbeta3 with Fibrillin

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-265423

**Type:** binding

**Compartments:** extracellular region, plasma membrane

**Inferred from:** Interaction of integrin alphaVbeta3 with Fibrillin (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp
**Interaction of integrin alphaVbeta3 with von Willbrand Factor**

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-265425

**Type:** binding

**Compartments:** extracellular region, plasma membrane

**Inferred from:** Interaction of integrin alphaVbeta3 with von Willbrand Factor (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

http://www.reactome.org
Interaction of integrin alphaVbeta3 with PECAM1

Location: Integrin cell surface interactions

Stable identifier: R-MMU-210304

Type: binding

Compartments: plasma membrane

Inferred from: Interaction of integrin alphaVbeta3 with PECAM1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp
Interaction of integrin alphaEbeta7 with Cadherin-1

Location: Integrin cell surface interactions

Stable identifier: R-MMU-265422

Type: binding

Compartments: plasma membrane

Inferred from: Interaction of integrin alphaEbeta7 with Cadherin-1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp
Interaction of integrin alphaIIbbeta3 with Fibronectin

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-349593

**Type:** binding

**Compartments:** extracellular region, plasma membrane

**Inferred from:** Interaction of integrin alphaIIbbeta3 with Fibronectin (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp
Adhesion of integrin alphaIIbbeta3 to fibrin network

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-114560

**Type:** binding

**Compartments:** extracellular region, plasma membrane

**Inferred from:** Adhesion of integrin alphaIIbbeta3 to fibrin network (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

Interaction of integrin alphaIIbbeta3 with von Willebrand factor

Location: Integrin cell surface interactions

Stable identifier: R-MMU-216072

Type: binding

Compartments: extracellular region, plasma membrane

Inferred from: Interaction of integrin alphaIIbbeta3 with von Willebrand factor (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp
Interaction of integrin alphaIIb beta 3 with THBS1 (Thrombospondin-1)

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-349603

**Type:** binding

**Compartments:** extracellular region, plasma membrane

**Inferred from:** Interaction of integrin alphaIIb beta 3 with THBS1 (Thrombospondin-1) (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

<a href='/electronic_inference_compara.html' target='NEW'>More details and caveats of the event inference in Reactome. For details on PANTHER see also: <a href='http://www.pantherdb.org/about.jsp' target='NEW'>http://www.pantherdb.org/about.jsp</a>
LUM (lumican) binds integrin alpha2beta1

Location: Integrin cell surface interactions

Stable identifier: R-MMU-4085133

Type: binding

Compartments: extracellular region, plasma membrane

Inferred from: LUM (lumican) binds integrin alpha2beta1 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

More details and caveats of the event inference in Reactome. For details on PANTHER see also: [http://www.pantherdb.org/about.jsp](http://www.pantherdb.org/about.jsp)
COMP binds Integrin alpha5beta1, Integrin alphaVbeta3, CD47

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-2426259

**Type:** binding

**Compartments:** extracellular region, plasma membrane

**Inferred from:** COMP binds Integrin alpha5beta1, Integrin alphaVbeta3, CD47 (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

[a href='/electronic_inference_compara.html' target = 'NEW']More details and caveats of the event inference in Reactome. For details on PANTHER see also: [a href='http://www.pantherdb.org/about.jsp' target='NEW']http://www.pantherdb.org/about.jsp
Endorepellin binds KDR (VEGFR2)

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-4088281

**Type:** binding

**Compartments:** plasma membrane, extracellular region

**Inferred from:** Endorepellin binds KDR (VEGFR2) (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

<a href='/electronic_inference_compara.html' target = 'NEW'>More details and caveats of the event inference in Reactome. For details on PANTHER see also: http://www.pantherdb.org/about.jsp</a>
**Endorepellin binds alpha2beta1 integrin**

**Location:** Integrin cell surface interactions

**Stable identifier:** R-MMU-4088220

**Type:** binding

**Compartments:** plasma membrane, extracellular region

**Inferred from:** Endorepellin binds alpha2beta1 integrin (Homo sapiens)

This event has been computationally inferred from an event that has been demonstrated in another species.

The inference is based on the homology mapping from PANTHER. Briefly, reactions for which all involved PhysicalEntities (in input, output and catalyst) have a mapped orthologue/paralogue (for complexes at least 75% of components must have a mapping) are inferred to the other species. High level events are also inferred for these events to allow for easier navigation.

Table of Contents

Introduction 1

Integrin cell surface interactions 2

Collagen types III, IV, V, VI, VIII, IX, XVI bind integrins alpha1beta1 and alpha2beta1 3

Collagen type I binds integrin alpha11beta1 4

Collagen type II binds integrin alpha10beta1 5

Collagen type VII binds integrin alpha2beta1 6

Collagen type XIII binds Integrin alpha1beta1 7

Collagen types VI, IX bind integrin alpha10beta1 8

Collagen type IX binds integrin alpha11beta1 9

Arresten binds integrin alpha1beta1 10

Endostatin binds integrin alphaVbeta3, alphaVbeta5, alpha3beta1, alpha5beta1 11

Tumstatin binds integrin alphaVbeta3, alpha3beta1 12

Canstatin binds integrins alphaVbeta3, alphaVbeta5 13

Tetrastatin binds integrin alphaVbeta3 14

THBS1 (Thrombospondin-1) binds Integrin alpha3beta1, alpha4beta1 15

Integrins alpha4beta1, alpha8beta1, alphaVbeta1, alphaVbeta3, alphaVbeta6 bind Fibronectin matrix 16

SPP1 (osteopontin) binds integrin alpha5beta1, alpha9beta1 17

SPP1 (osteopontin) binds CD44 18

VCAM1 binds Integrin alpha4beta1 19

Integrin alpha4beta1 binds JAM2-JAM3 20

MADCAM1-1 binds Integrin alpha4beta7 21

Interaction of integrin alpha8beta1 with Tenascin-C 22

Interaction of integrin alpha9beta1 with VCAM1 23

Interaction of integrin alpha9beta1 with Tenascin-C 24

Interaction of integrin alphaDbeta2 with fibrin 25

Interaction of integrin alphaXbeta2 with fibrin 26

VTN (vitronectin) binds Integrin alphaVbeta3, alphaVbeta5, alphaVbeta8 27

Integrin alphaXbeta2 binds JAM3 28

ICAM1-5 bind Integrin alphaLbeta2 (LFA-1) 29

Integrin alphaLbeta2 (LFA-1) binds F11R (JAM-A) 30

Integrin alphaMbeta2 (MAC1) binds JAM3 31

BSG (basigin) binds Integrin alpha3beta1, alpha6beta1 32

Interaction of integrin alphaVbeta3 with IPSP (Bone sialoprotein 2) 33

Interaction of integrin alphaVbeta3 with Tenascin 34
Interaction of integrin alphaVbeta3 with Fibrillin 35
Interaction of integrin alphaVbeta3 with von Willbrand Factor 36
Interaction of integrin alphaVbeta3 with PECAM1 37
Interaction of integrin alphaEbeta7 with Cadherin-1 38
Interaction of integrin alphaIIbbeta3 with Fibronectin 39
Adhesion of integrin alphaIIbbeta3 to fibrin network 40
Interaction of integrin alphaIIbbeta3 with von Willebrand factor 41
Interaction of integrin alphaIIb beta 3 with THBS1 (Thrombospondin-1) 42
LUM (lumican) binds integrin alpha2beta1 43
COMP binds Integrin alpha5beta1, Integrin alphaVbeta3, CD47 44
Endorepellin binds KDR (VEGFR2) 45
Endorepellin binds alpha2beta1 integrin 46
